Office Action Summary	Examiner	Art Unit				
	AJIT G. PATEL	2616				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 02 Oc	ctober 2007.					
2a) ☐ This action is FINAL . 2b) ☑ This	action is non-final.					
3) Since this application is in condition for allowar	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under E	x parte Quayle, 1935 C.D. 11, 45	3 O.G. 213.				
Disposition of Claims						
 4) Claim(s) 1-15 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) 7-16 is/are allowed. 6) Claim(s) 1-5 is/are rejected. 7) Claim(s) 6 is/are objected to. 						
8) Claim(s) are subject to restriction and/or	relection requirement.					
Application Papers						
9) The specification is objected to by the Examine		Eveminor				
10) The drawing(s) filed on is/are: a) acce						
Applicant may not request that any objection to the correct						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

Application/Control Number: 10/771,888 Page 2

Art Unit: 2616

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- 2. Claim 2 is objected to because of the following informalities: "the processor" in lines 12 recited twice. Appropriate correction is required.
- 3. Claim 1 recites the limitation "the derived keys" in line 4. There is insufficient antecedent basis for this limitation in the claim.
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by the admitted prior art (see pages 1-5 of the specification, fig. 1).

Art Unit: 2616

Regarding claim 1, the admitted prior art discloses the processor (22 of fig.1) requesting by way of a trusted hardware channel (30 of fig. 1) that the peripheral provide the identification to such processor by way of such trusted channel, the trusted channel being independent of and exterior to the path (26 of fig. 1); the processor receiving by way of the trusted hardware channel the identification from the peripheral (lines 11-17 of page 3); and the processor, having prior knowledge of the peripheral and the identification thereof, concluding based on the received identification by way of the trusted channel that the peripheral is indeed the peripheral and imparting trust to the peripheral based on such conclusion, and exchanging data with the peripheral over the path based on the identification (18 and 20 of fig. 1).

Regarding claim 2, the admitted prior art discloses processor and the peripheral employing the identification to derive a set of mutually agreed- upon shared keys to be employed to exchange data therebetween, and in fact exchanging data therebetween based on the derived keys (lines 23-27 of page 3; lines 10-18 of page 2).

Regarding claim 3, the admitted prior art discloses the computing device (14 of fig. 1) includes a trusted hardware module (THM) (28 of fig. 1) physically interposed between the processor and the peripheral to form the trusted hardware channel therebetween, the THM being trusted to communicate with both the processor and the peripheral in a trusted manner over the trusted channel and being identifiable to the processor over the trusted channel, the method comprising: the processor requesting the THM over the trusted channel formed thereby to obtain the identification from the peripheral; the THM in turn requesting the peripheral over the trusted channel formed

thereby to provide such identification; the peripheral returning the identification to the THM over the trusted channel formed thereby; and the THM in turn returning the identification to the processor over the trusted channel formed thereby, whereby each request and return over the trusted channel assures the processor that the identification returned is in fact from the peripheral (line 3 of page 4 through line 16 of page 5).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (page 1-5 of the specification).

Regarding claims 4 and 5, the admitted prior art discloses all the claimed subject matter as described in previous paragraph. The admitted prior art also discloses the keys for security but fails to disclose using the specific key such a unique public-private security key pair (PU-PER, PR-PER), and wherein the identification of the peripheral is (PU-PER). Using any types of security keys would have been obvious to one skilled in the art because it depends on the network.

6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/771,888

Art Unit: 2616

7. Claims 7-15 are allowed.

8. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to AJIT G. PATEL whose telephone number is 571-272-

3140. The examiner can normally be reached on MONDAY- FRIDAY.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynn Feild can be reached on 571-272-2092. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
